

iwebfolio®

iWebfolio is the most flexible web-based electronic portfolio solution on the market - it supports today's needs and grows with you.

## e-Portfolios with a Purpose

*iWebfolio enables individuals to create and manage e-portfolios for one or more specific purposes.*

### Learning Portfolios

enable rich reflection and feedback to support formative evaluations, while facilitating the collection of evidence for program improvement.

### Assessment Portfolios

allow individuals to demonstrate competencies supporting summative evaluations.

### Presentation Portfolios

enable the showcase of achievement for a variety of academic and professional purposes.

iWebfolio has the technical infrastructure and configurability to enable rapid adoption and to support deployments of any size.

iWebfolio supports lifelong learning across educational institutions, employers, and professional organizations.

## A Structured Foundation for Your Goals

Nuventive

- > Users can configure e-portfolios based on templates, or build them from scratch.
- > Faculty and staff create and manage templates within an institution's exclusive library, supporting a variety of learning, assessment and presentation needs.
- > Institutions can collect learning evidence and aggregate data to support continuous improvement.

# Configure e-Portfolios to Address a Variety of Needs

iWebfolio is an e-portfolio platform that enables institutions to manage deployments of any size from a single system. Institutions can develop and manage template collections that support evolving needs and are accessible exclusively to their users.

## Templates: A Multi-Purpose Framework

iWebfolio institutions use templates and measures to serve multiple purposes - giving individuals a space to learn and demonstrate achievement while supplying institutions with data for assessment.

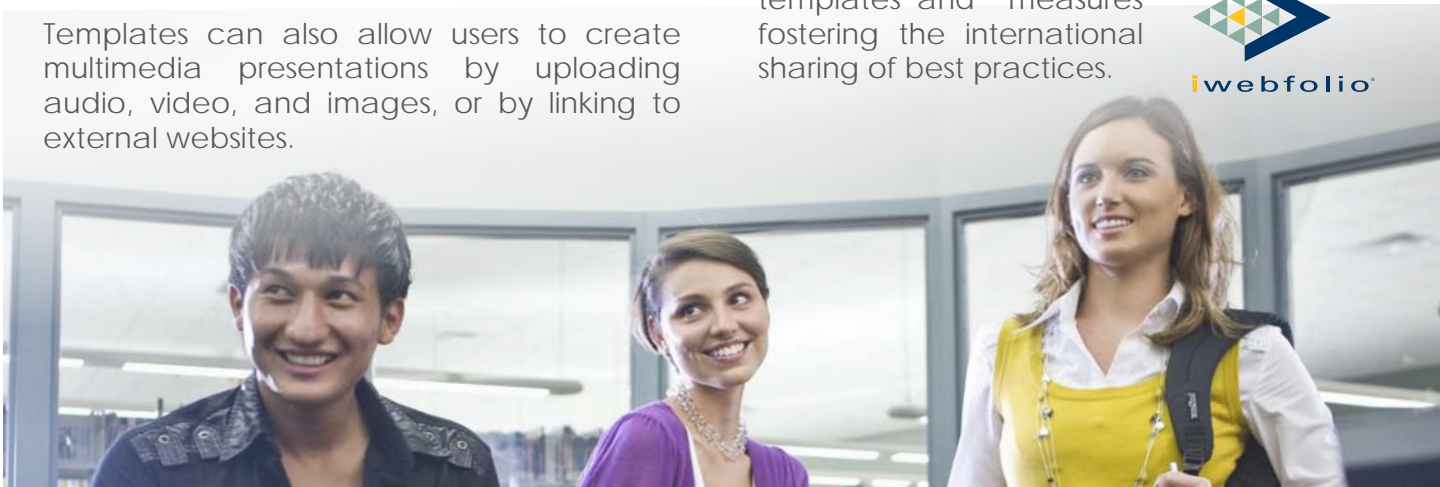

Institutions are able to design templates that give users varying degrees of creative control. Template designs may offer users little or no flexibility; they may permit users to select navigation, design or presentation styles; and may optionally allow users to create entire portfolios of their own design.

Templates can also allow users to create multimedia presentations by uploading audio, video, and images, or by linking to external websites.

## Shared Templates & Measures Library

The Shared Templates and Measures Library (STML) is a cooperative repository of content that encourages sharing of best practices among iWebfolio institutions. In addition, AAC&U's VALUE Rubrics are available to any organization seeking to measure Essential Learning Outcomes.

iWebfolio institutions can copy and modify templates and rubrics voluntarily contributed to the STML by other iWebfolio institutions worldwide. Institutions are free to submit and copy any number of templates and measures fostering the international sharing of best practices.

## Intelligent Deployment

Extensive experience enables Nuventive to offer deployment and support solutions that meet your needs, regardless of your institution's size.

### Nuventive Services — Get it Right the First Time

Our "train-the-trainer" model applies the knowledge and expertise from many institutional deployments to make your rollout a success. We have the experience to help you and your organization communicate and implement key strategies for successful deployments of any size.

We can help you design templates that will make the process of building portfolios easy for your users to understand and execute. Deploying well designed templates and measures will allow you to collect the exact data your institution requires.

### World Class Support

Our friendly and knowledgeable support team strives to exceed your expectations. Online or via telephone, our objective is to deliver necessary information to your users as quickly as possible.
