Nuventive Announces Game Changing BI Solution Giving Added Visibility into Improvement Processes

Nuventive Improve Analytics allows customers using Nuventive Improve to leverage information related to improvement initiatives at all levels

PITTSBURGH, PA – November 8, 2017 – Nuventive, a provider of cloud based institutional improvement solutions and services, today announced general availability of Nuventive Improve Analytics a business intelligence (BI) solution for Nuventive Improve customers (hosted) utilizing Microsoft Power BI.

Nuventive Improve Analytics allows customers to view Power BI reports and create interactive dashboards. “We can report on so much useful information from Nuventive Improve!” said Paul DeSante, Nuventive Services Consultant. “Nuventive has created several data models and corresponding report templates that facilitate monitoring key indicators governing various processes (e.g. Assessment, Planning, Program Review). Using the report templates as a starting place, Nuventive will work with customers to create reports that best address their specific needs.”

“Improve Analytics is a game changer for the Nuventive Improvement Platform”, said Gary Chohan, Nuventive Vice President and Chief Product Officer. “It provides rich reporting capabilities into planning and assessment activities including graphical dashboards, advanced analytics reporting and process monitoring which can be shared internally and externally. We look forward to providing increasing value through this product as additional integrated Nuventive offerings become available.”
